PROFESSIONAL SUMMARY

Senior Flutter Engineer specializing in cross-platform architecture, native plugin development (Dart-to-Kotlin), and zero-to-one product launches. Proven track record of scaling high-performance mobile applications, managing real-time WebSocket infrastructures, and engineering native voice-to-server interfaces. Adept at driving core application stability and leading end-to-end cross-platform deployment cycles. Passionate about bridging complex backend data with intuitive UI/UX designs, maintaining clean code architectures, and mentoring engineering teams to deliver robust software solutions.

TECHNICAL SKILLS

Mobile Frameworks: Flutter, Dart, Riverpod (State Management)

Native & APIs: Kotlin (Method Channels), WebSockets, REST API Integration

Tools & Databases: Firebase Cloud Messaging (FCM), MySQL, Local Storage (Hive/Shared Preferences)

Architecture & Delivery: Asynchronous Programming, App Release Management (Play Store & App Store), Memory Optimization

Familiar With: Python, Flask, Vue.js, PHP

PROFESSIONAL EXPERIENCE

Software Developer (Flutter)

08/2022 – Present

Vtiger CRM

Bengaluru, India

- **Zero-to-One Product Architecture:** Architected and deployed a cross-platform mobile application for internal operations (live on App Store and Google Play), taking the product from concept to production.
- **Voice-to-Server Interface:** Engineered a voice-driven user interface utilizing native Speech-to-Text (STT) and Text-to-Speech (TTS) plugins, seamlessly bridging mobile clients with backend AI APIs to accelerate data retrieval and workflows.
- **Real-Time "Internal Hub" Module:** Spearheaded the development of a real-time enterprise messaging module using WebSockets for live data synchronization, integrated with local notifications for immediate message delivery.
- **Push Notification Integration:** Supported 10,000+ active users by integrating Firebase Cloud Messaging (FCM) to handle reliable push notification delivery for the primary CRM application.
- **Performance & Stability:** Achieved a 0.03% crash rate and slashed initial login load times by 50% (from 30s to 12-15s) through continuous Play Console monitoring and refactoring sequential blocking API calls into concurrent background executions using Future.wait.
- **Team Leadership & Release Management:** Led technical direction for a 3-person mobile team, taking ownership of code reviews, manual testing, and end-to-end release cycles (AAB/APK deployments) for iOS and Android.

Flutter UI Developer (Internship)

ENMAZ Engineering Services Pvt. Ltd.

10/2021 – 11/2021

Bengaluru, India

- **UI/UX Implementation:** Translated complex Figma wireframes into highly responsive Flutter screens, ensuring strict adherence to design guidelines and cross-device compatibility.
- **Component Reusability:** Built a library of modular, reusable UI components that accelerated the prototyping phase of the mobile app.

OPEN SOURCE & PROJECTS

smart_notification_listener | *Creator & Lead Maintainer*

- Engineered and published a highly customized Flutter package to pub.dev that enables apps to listen to and interact with device-level notifications.
- Built a robust Dart-to-Kotlin bridge using Method Channels to handle background Android OS processes and notification payloads natively.
- Authored comprehensive documentation and example code to ensure seamless adoption by the broader Flutter developer community.

EDUCATION

R.N.S Institute of Technology

Bachelor's in Engineering: Information Science and Engineering

07/2019 – 05/2022

Bengaluru, India

- CGPA: 7.17/10

Dayananda Sagar Institute Of Technology

Diploma: Computer Science and Engineering

07/2016 – 05/2019

Bengaluru, India

- Percentage: 71.8%

CERTIFICATES

Digital Skills: User Experience | Future Learn (06/2022 – 06/2022)

Foundations of User Experience (UX) Design | Coursera x Google (07/2021 – 07/2021)
